

Capacityd<sup>®</sup> optimizes supporting processes by using a combination of data, technology and supply chain expertise. Capacityd<sup>®</sup> specializes in capacity management, asset management & tracking, inventory management and workflow management. This allows your organization to make better use of time, talent and assets. The result for your organization? Lower expenses, better quality and more vital and empowered employees.

## Who are we?

Capacityd<sup>®</sup> is a joint venture of delaware and Vebego and started in 2020 looking to relieve professionals in The Netherlands. Started in healthcare, capacityd<sup>®</sup> now is expanding our services to Belgium and other industries, such as semiconductor industry.

## Benefits we deliver

### Efficient processes

Capacityd<sup>®</sup> creates an overview in a maze of supporting processes. With an integrated approach.

### Empowering colleagues

Professionals in your organization recoup time. As a result, they can make better use of their talents and experience more job satisfaction.

### Up to 40% fewer tools

Thanks to efficient processes and track & trace technology, we can reduce the purchase of resources, by at least 10% and sometimes even 40%. This also reduces the need for management and maintenance.

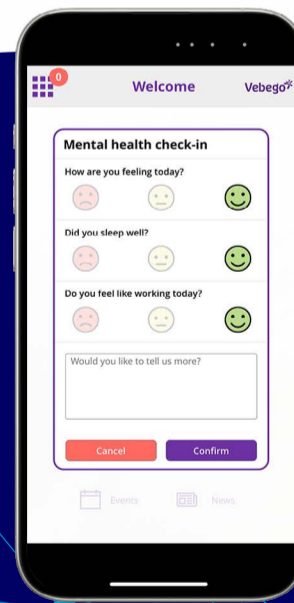

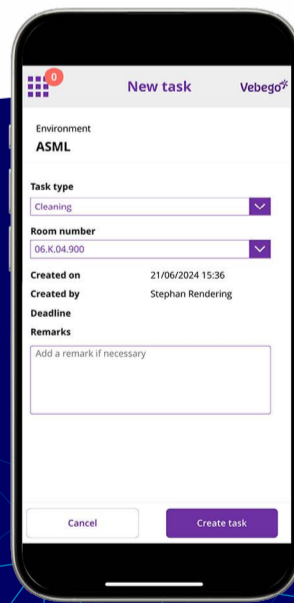

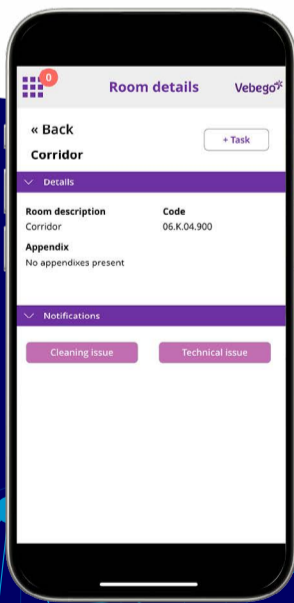

### Reduced costs

It's a sum. Efficient processes, sustainably employable employees and less purchasing and stock ensure lower expenses.

### Insights and management information

Capacityd<sup>®</sup> enriches and analyses data so that you can make the right decisions.

## Our Integrated Technology
